Common Operating Picture Synchronizer (COPS)

September 2015

Terminal Learning Objective

Action: Demonstrate COPS

Conditions: Given access to a computer with access to the COPS database via wireless or LAN connection and an awareness of Operational Environment (OE) variables and actors.

Standard: The students will meet the standard of 70% accuracy when they:

- Understand COPS Terminology
- Define the different COPS functions
- Execute the different COPS operations
- Produce a strength report

Business Intelligence

ATTENTION: The Business Intelligence is operational.

You are accessing a U.S. government (USG) information system (IS) that is provided for USG-authorized use only. By using this IS (which includes any device attached to this IS), you consent to the following conditions:

- The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, COMSEC monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.
- At any time, the USG may inspect and seize data stored on this IS.
- Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.
- This IS includes security measures (e.g., authentication and access controls) to protect USG interests--not for your personal benefit or privacy.
- Notwithstanding the above, using this IS does not constitute consent to PM, LE or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants. Such communications and work product are private and confidential. See User Agreement for details.

ATTENTION: Once logged into the system, if the screen does not display all the correct information please press ctl/F5 to refresh the screen.

ATTENTION: Click on the subject area that you would like to view the analysis, if you do not have access you will need to see your S1 or Security Manager.

Click on "COPS"

Common Operating Picture Synchronizer (COPS)

COPS

Click on "Tab"

ATTENTION: The Common Operating Picture Synchronizer (COPS) is operational.

The Common Operating Picture Synchronizer (COPS) is a tool designed to give HRC and ACOM personnel strength managers the capability to view officer and enlisted personnel strength and authorization information. Both PMAD and TAADS authorization information is available to assist us in resolving issues that may occur as we rapidly transform the Army. COPS provides the capability to view strength information by ACOM, DML, and DMSL level with drill down capability to authorization information at the Specialty and Grade and ASI/SQI. In addition, it also provides the capability to drill down assigned strength to the individual.

COPS is now loaded with PMAD 1412 both EDAS and TOPMIS

UAD 1502 is now LOADED in EDAS and TOPMIS.

ATTENTION: For all new COPS account request please contact your sponsor to use HIMS to request an account. For any questions not related to new accounts please contact Luther Monroe at luther.j.monroe.civ@mail.mil or by phone at (502) 613-5024.

Please note, the COPS NEWS page has been updated with new information.

7-Jul-2014

ATTENTION: Once logged into the system, if the screen does not display all the correct information please press ctl/F5 to refresh the screen.

Selected Columns
Double click on column names in the Subject Areas pane to add them to the analysis. Once added, drag-and-drop columns to reorder them. Edit a column's properties, formula and filters, apply sorting, or delete by clicking or hovering over the button next to its name.
Drop Columns Here.
Here you will drag any columns you want on your report into this area at the top.
Filters
Add filters to the analysis criteria by clicking on Filter option for the specific column in the Selected Columns pane, or by clicking on the filter button in the Filter pane header. Add a saved filter by clicking on add button after selecting its name in the catalog pane.
Add Filters Here.
Here you will add any filters to any of the columns you selected from above.

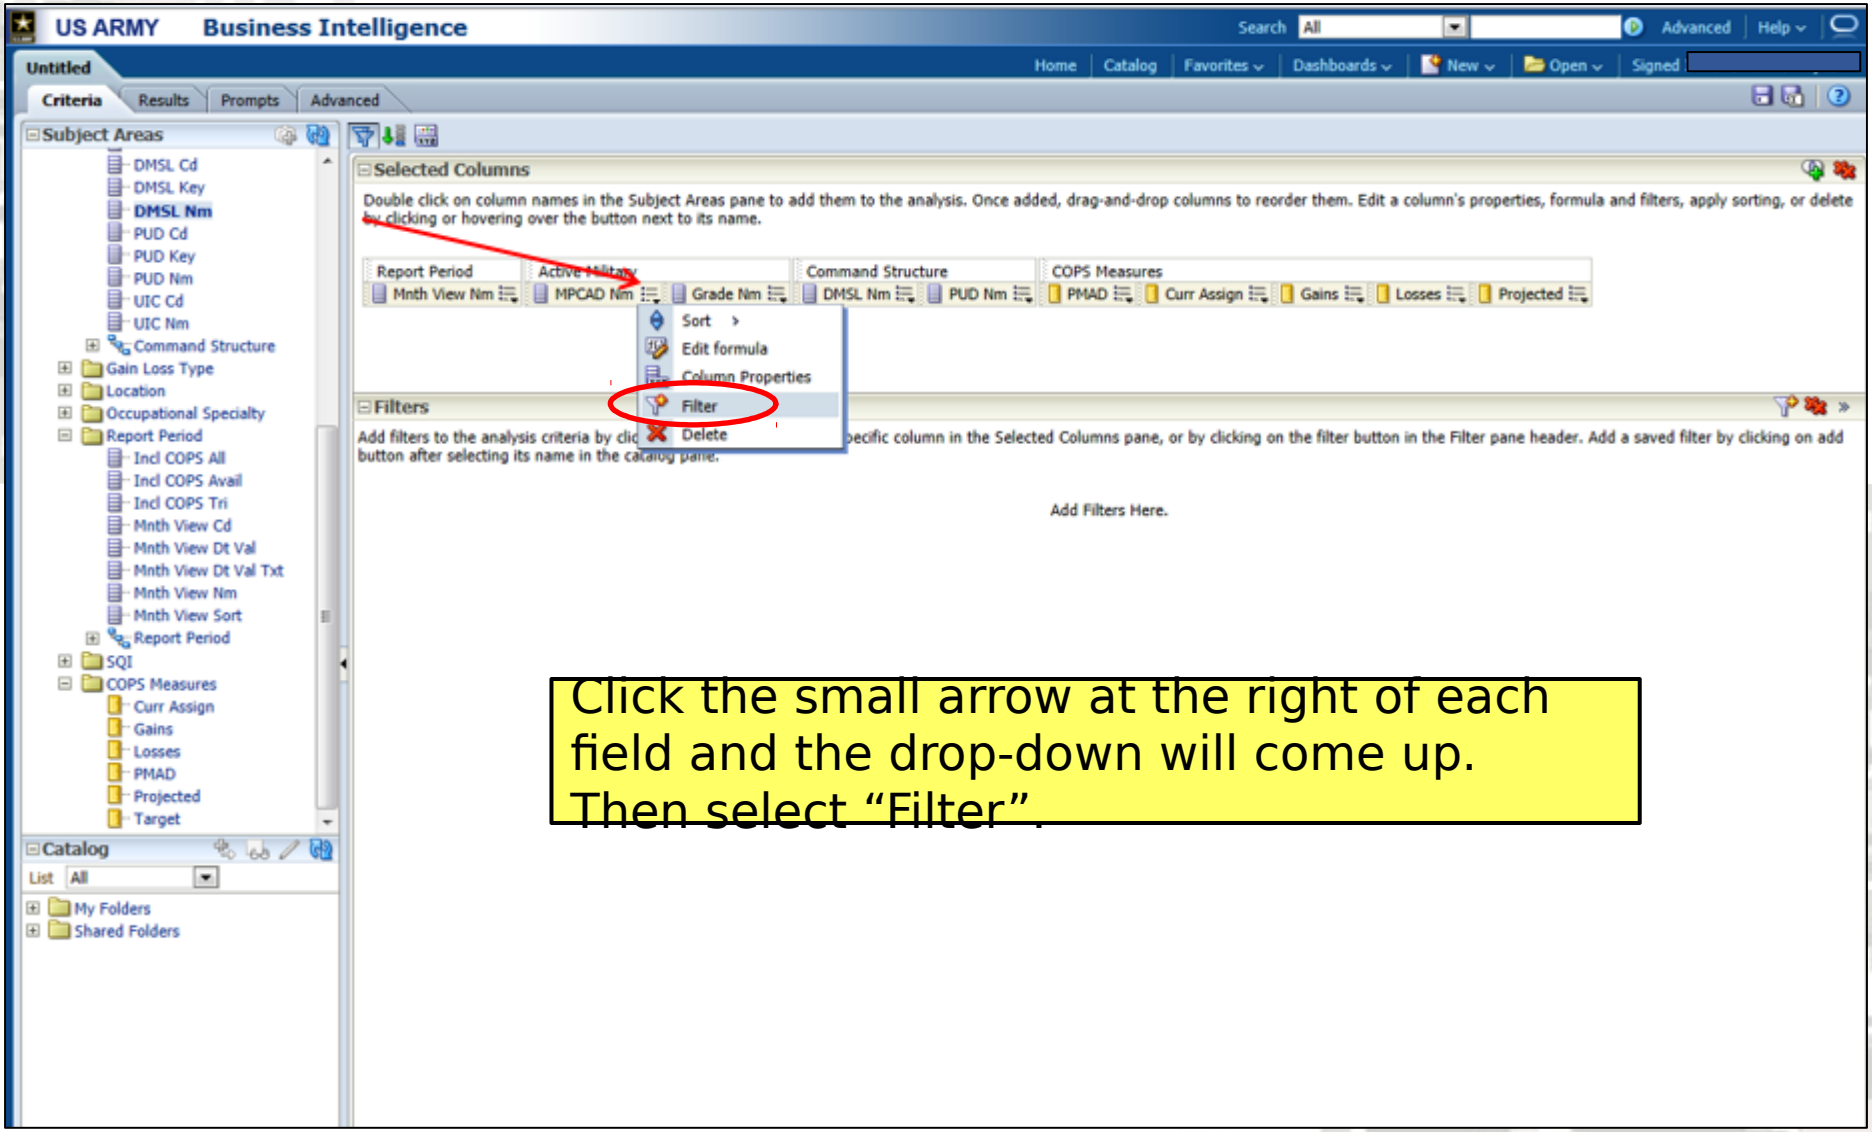
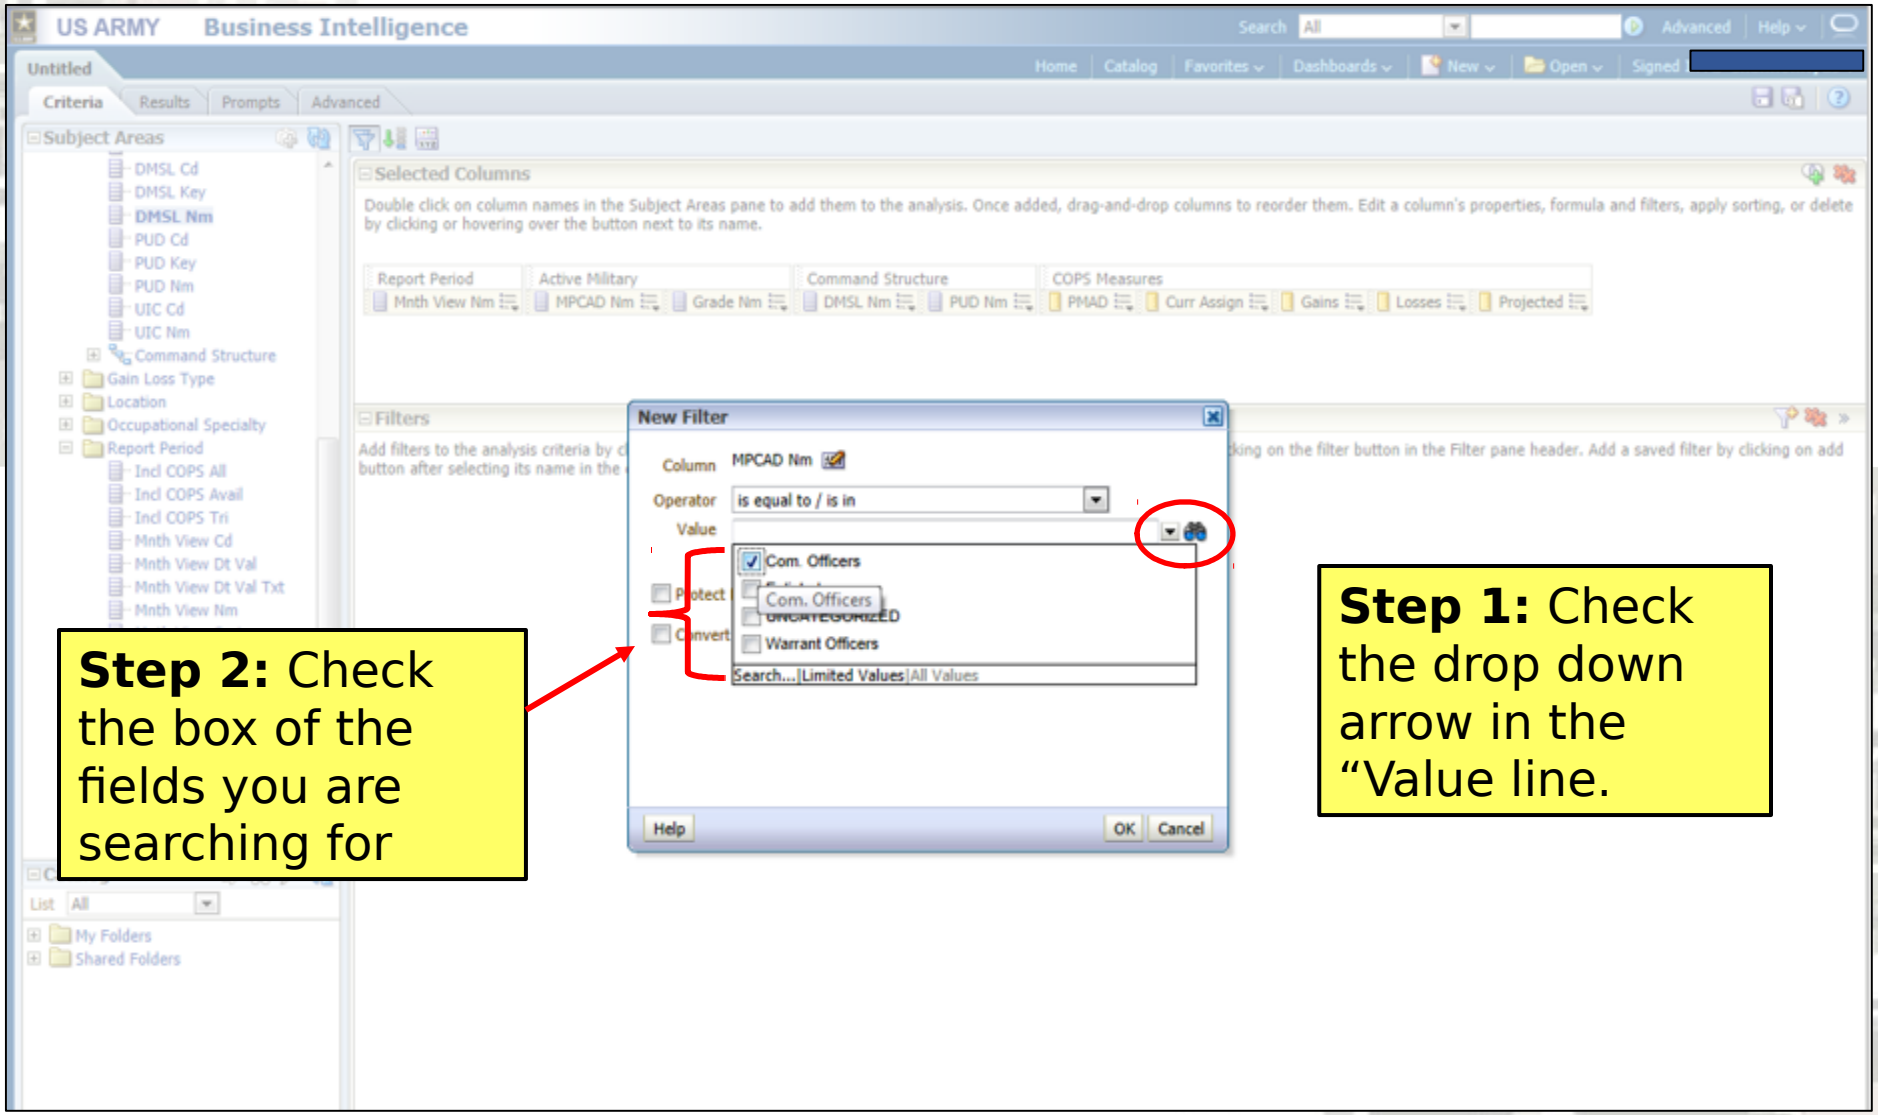
Filtering (1 of 4)



Click the small arrow at the right of each field and the drop-down will come up. Then select “Filter”.

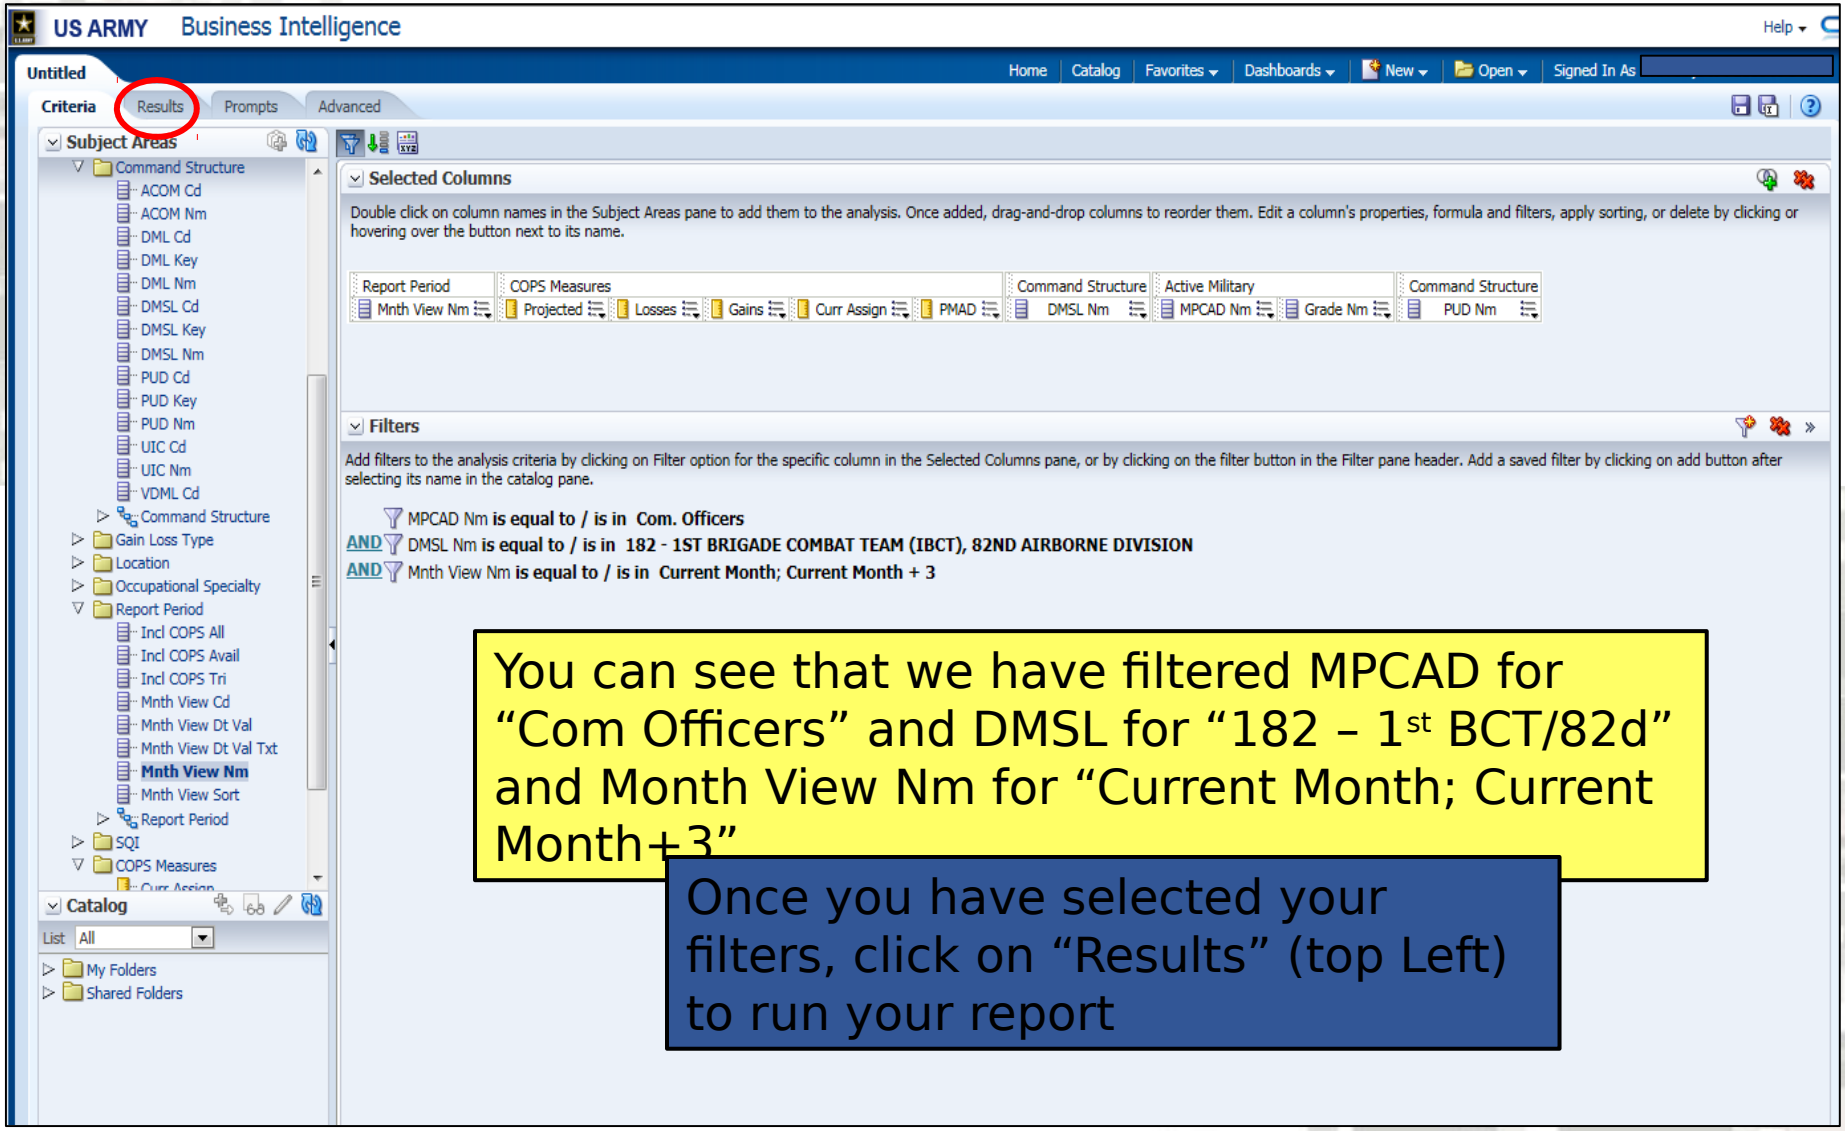
Filtering (2 of 4)



Step 2: Check the box of the fields you are searching for

Step 1: Check the drop down arrow in the "Value line.

Filtering (3 of 4)



You can see that we have filtered MPCAD for "Com Officers" and DMSL for "182 – 1st BCT/82d" and Month View Nm for "Current Month; Current Month+3"

Once you have selected your filters, click on "Results" (top Left) to run your report

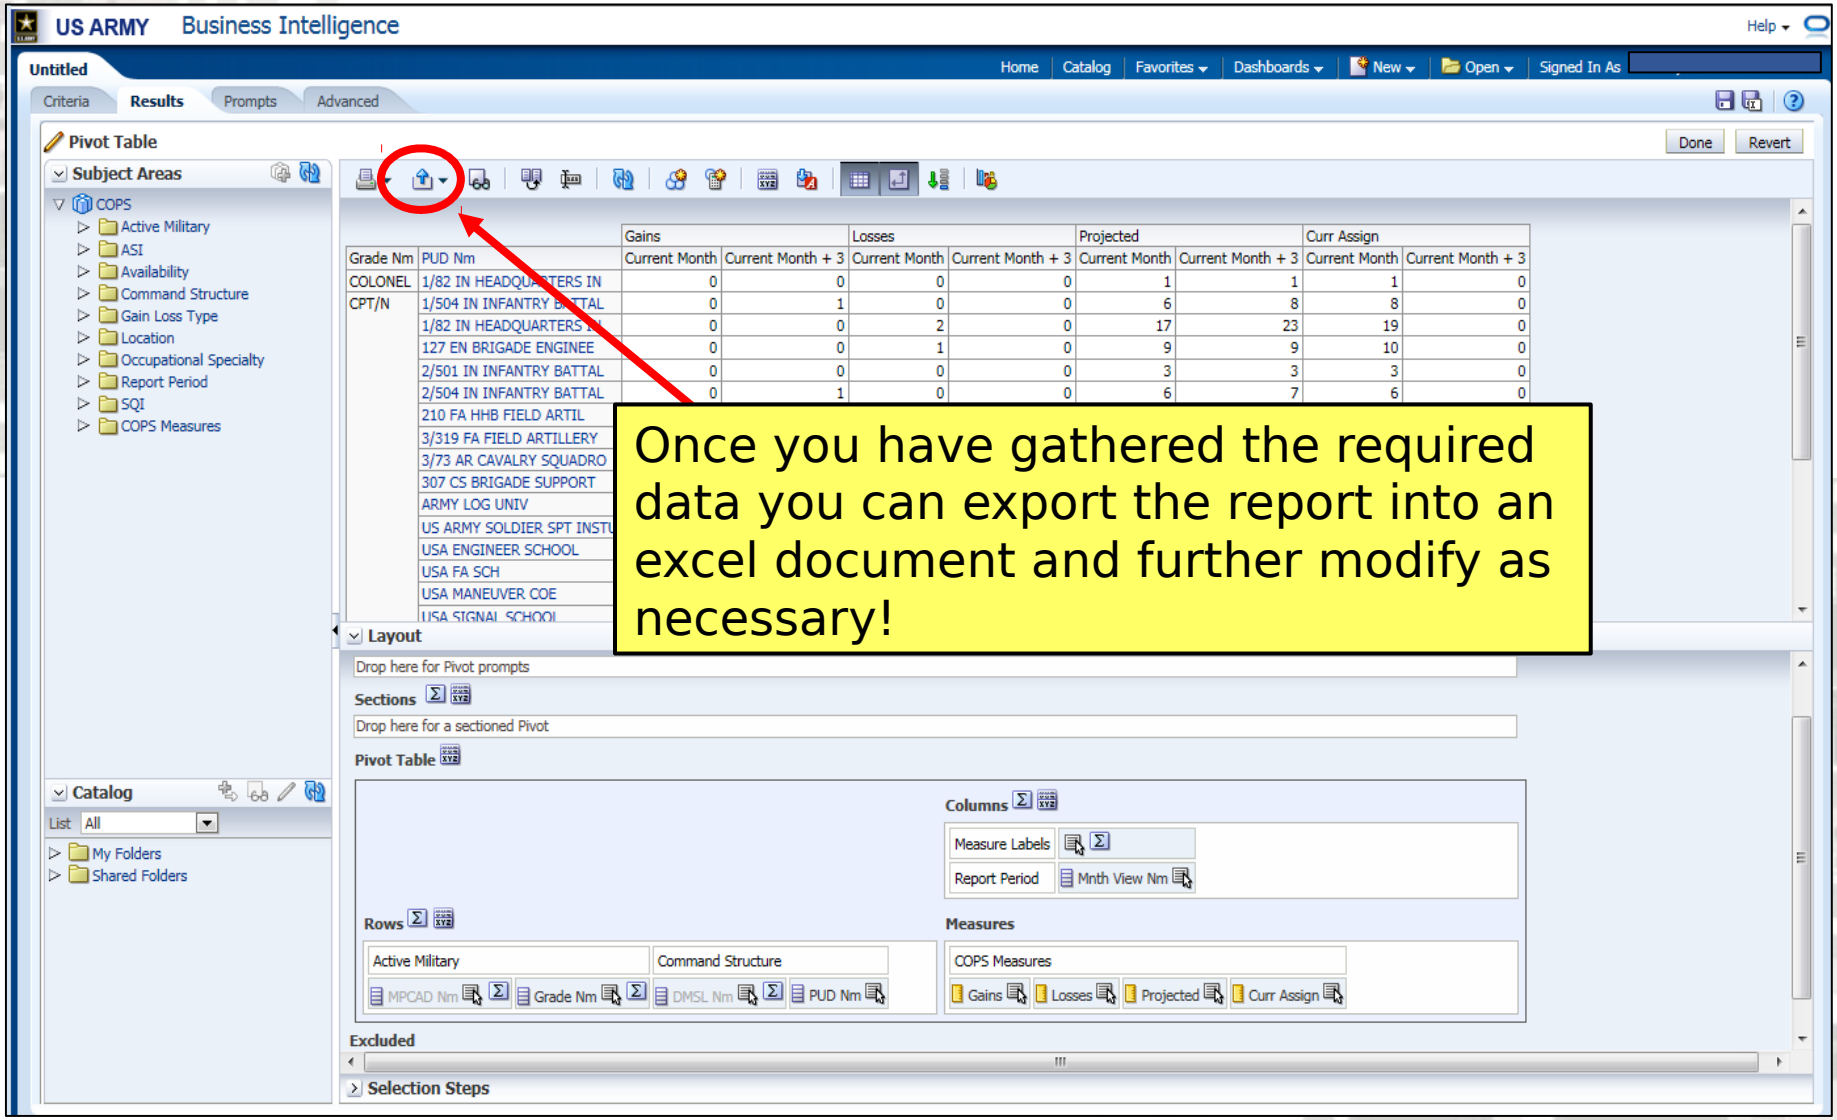
Report Export



Summary

So why is COPS important to a Strength Manager?

1. It allows you to view combined unit strength.
2. It allows you to view combined unit strength forecasts.
3. It is a useful tool for developing and saving customized reports relevant to changing information needs.
4. It allows you to drill down to a combined unit to view unit rosters.
5. It allows you to drill through and view selected
